

Trapezium Ergo Wrist Rest

Conforms to your wrists and offers more comfort.

The Trapezium Wrist rest has been designed to offer support for your wrists and hands as you use your computer keyboard. The keyboard wrist rest is made from firm cushioning gel with an antibacterial layer which ensures optimal hygiene. The Trapezium Wrist rest is a good support for your wrists when you are typing and using your mouse for hours at a time, it helps to create a healthier and more comfortable workplace.

Ergonomic background

When working with a keyboard and mouse it is important that the arm is sufficiently supported. A wrist support helps to keep the wrist straight during typing and can be used "to rest" for a moment during one's work. Holding your wrist at the right height when typing is important. It must be kept as straight as possible with the keyboard. This keeps the wrist posture neutral and avoids muscle strain.
