

Kinesis® Freestyle® 2 Numeric Keypad (KP800) for PC & Mac

Getting Started

This is the second and newest version of the Freestyle2 numeric keypad. The latest version is identical to its predecessor except for two distinctions: 1) includes a detachable palm support; and 2) omits the 2-port USB hub. The Freestyle2 Keypad matches the low-profile design of the Freestyle2 keyboard and utilizes the same low-force, quiet tactile membrane key switch.

Compatibility

This keypad will operate on virtually any PC & Mac with an available USB port. No drivers are required so you can get started immediately by just plugging it in to your computer (the first time you do this, the computer should already be running).

Health Caution

Improper or excessive keying may contribute to painful and permanent injuries. Read the Health and Safety details on the bottom label of the keypad. If you experience pain, weakness, numbness, or tingling while or after using your computer, consult a qualified health professional for advice.

Special keys*

While most of the keys are exactly what you would expect on a numeric keypad, there are several special key actions at the top which offer increased convenience and productivity plus reduced repetitive motions. Tab, Backspace and Equals (=) are active by default, but you can toggle the Fn key (the Fn LED will illuminate) to turn on the driverless hot keys for cut, copy, and paste. No other key actions change when Fn is toggled, so you may leave Fn on continuously if you wish, or toggle back and forth as your tasks change. * Designed for Windows. Mac users will need to change the Control key action to Command in System Preferences>Keyboard>Modifier Keys.

LEDs

The blue LEDs in the upper right corner of the keypad include the normal Num Lock plus an Fn LED. When the Fn LED is illuminated, the Fn layer is active. The Fn LED is also on when the computer is in sleep mode.

Detachable Palm Support

The detachable palm support keeps your wrists straight, reducing harmful extension/bending of the wrists. The snap fit design makes it easily removable.

Warranty & Technical Support

A two-year warranty applies to the original purchaser of the keypad. For details visit:

Regulatory information

FEDERAL COMMUNICATIONS COMMISSION RADIO FREQUENCY INTERFERENCE STATEMENT

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help

Warning: To assure continued FCC compliance, the user must use only shielded interfacing cables when connecting to computer or peripheral. Also, any unauthorized changes or modifications to this equipment would void the users authority to operate.

INDUSTRY CANADA COMPLIANCE STATEMENT

This Class B digital apparatus meets all requirements of the Canadian Interference-causing Equipment Regulations. Cet Appareil numérique de la classe B respecte toutes les exigences du Règlement sur le matériel brouilleur du Canada.
