

# Armrest Symmetric

The Mousetrapper armrest was designed with the user in mind. Whether you use it in combination with a Mousetrapper or not, it helps to relieve strain in your neck, shoulders, backs and forearms. Its design promotes a naturally centred and relaxed working position in front of your Mousetrapper or keyboard. This prevents the risks of carpal tunnel syndrome and strain injuries.

## Benefits of armrest

Thanks to the uniquely thin central section, which is only 40 mm deep, it encourages you to work very close to the keyboard, which prevents over-stretching your forearms. The Mousetrapper armrest is easy to clean and disinfect, since the top surface is made from black artificial leather.

The Mousetrapper armrest comes with a set of two Z-shaped brackets as standard, which will fit most desks on the market. The desktop should not be thicker than 40 mm.

## Facts

- » Width: 575 mm
- » Depth: 220 mm
- » Height: 25 mm
- » Waist: 40 mm
- » Weight: 1100 g
- » Product code: TB216
