Choosing the Language

Connect through USB-C

Connect **TiPY**™ to your computer using the USB-C cable provided.
⎡ESC⎤ lights up red. **TiPY**™ is connected to your computer and will charge if necessary (⎡ESC⎤ flashes red).

Connect through Bluetooth

Disconnect USB-C cable. ⎡Fn⎤ flashes green. Without cable, **TiPY**™ automatically searches for a Bluetooth connection. Wait for your computer to find the new Bluetooth device. Follow the instructions on the screen to pair **TiPY**™ with your computer. When connected, ⎡Fn⎤ lights up green.

In case of Bluetooth interferences, ⎡Fn⎤ flashes very fast. In this case, remove the Bluetooth device from your computer and pair it again. The **TiPY**™ Bluetooth connection can only be removed from the computer the device is connected to.

Connect

TiPY ™

to your computer

After some time of inactivity, TiPY™ enters standby mode, then sleep mode.
Press any key to wake TiPY™ from standby or sleep mode.
[ESC] flashes red when battery is low.

Both left-handers and right-handers can use TiPY™. In order to switch sides, take off the handpad,
turn the keyboard around, and put the handpad back on. TiPY™ automatically detects which side is
in use and deactivates the bottom side. The mouse joystick is always located on the thumb's side.

Left-handed use   Right-handed use

Press [NUM] to activate or deactivate
the number pad. When activated,
the key lights up blue.

Good to know

TiPY ™
